

PATIENT INFORMATION

Field	Details
Name	John 4
Date of Birth	2/1/2000
Gender	male
Status	discharged

INITIAL VISIT

- Chief Complaint: Chief Complaint *
- Chiropractic Adjustment: Cervical Spine, Sacroiliac Spine, Ankle R / L
- Acupuncture: Thoracic Spine, Hip R / L, Shoulder (GHJ) R / L
- Physiotherapy: EMS, NMR, Paraffin Wax
- Rehabilitation Exercises: Sacroiliac Spine
- Treatment Frequency: 2 times/week, re-eval in 3 weeks
- Referrals: Orthopedist, Neurologist, Pain Management
- Imaging: XRAY: T/S, Sacroiliac Joint L, Knee R, Ankle L; MRI: C/S, Sacroiliac Joint R, Hip L, Ankle R; CT: Elbow R, Hip R, L/S, Knee L, Shoulder R
- Diagnostic Ultrasound: Diagnostic Ultrasound
- Nerve Study: EMG/NCV upper
- Restrictions: Avoid activity for 2 weeks, lifting limit 3 lbs
- Disability Duration: 1 week
- Other Notes: john4444john4444john4444john4444john4444

FOLLOW-UP VISIT

- Areas Status: ' Improving ' Exacerbated
- Muscle Palpation: Muscle Palpation:
- Pain Radiating: Pain Radiating:
- Range of Motion: ' WNL (No Pain) & WNL (With Pain) ' Improved
- Orthopedic Tests: Pain Radiating:Pain Radiating: - Pain Radiating:
- Activities Causing Pain: Pain Radiating: Pain Radiating:
- Treatment Plan: Pain Radiating: (Pain Radiating: times/week)
- Overall Response: ' Improving
- Diagnostic Study: Pain Radiating: of Pain Radiating:: Pain Radiating:
- Home Care: Pain Radiating:

DISCHARGE VISIT

- Range of Motion: 10% of pre-injury ROM
- Diagnostic Study: of :

CHIEF COMPLAINT

- Chief Complaint: The patient, identified as John4, presented with a chief complaint of undefined body parts, characterized by intermittent and worsening symptoms with a severity level of 6.

PHYSICAL EXAMINATION FINDINGS

- Physical Examination Findings: Upon examination, the patient did not report any specific quality, exacerbating factors, or radiating pain. There were no signs of sciatica or symptoms radiating to other body parts.

ASSESSMENT AND PLAN

- Assessment and Plan: Based on the subjective intake information provided, further evaluation and diagnostic tests are warranted to determine the underlying cause of the undefined symptoms. A comprehensive physical examination and additional investigations may be necessary to establish a definitive diagnosis and formulate an appropriate treatment plan.

MEDICAL HISTORY

- Medical History: The patient's medical history, including allergies, medications, conditions, surgeries, and family history, is documented under the name John4. Further details regarding the medical history are required for a more thorough assessment.

SUBJECTIVE INTAKE

- Subjective Intake: The patient reported a severity level of 6 for the symptoms, which were intermittent and worsening in nature. Additional notes provided by the patient are recorded as "John4John4." The quality of symptoms, exacerbating factors, symptoms themselves, and radiating pain were not specified by the patient.

ATTORNEY INFORMATION

- Attorney Information: No specific attorney information was provided in the medical documentation.

INITIAL VISIT

- Initial Visit: During the initial visit, the patient, John4, presented with undefined symptoms of severity 6, which were intermittent and worsening. A detailed subjective intake was obtained, and a physical examination revealed no specific findings related to the symptoms reported.

FOLLOW-UP VISIT

- Follow-up Visit: A follow-up visit is recommended to further assess the patient's condition, conduct additional diagnostic tests if necessary, and formulate a comprehensive treatment plan based on the findings from the initial evaluation.

DISCHARGE VISIT

- Discharge Visit: At the time of this report, no discharge visit has been scheduled or conducted for the patient, John4. Further follow-up and management are required to address the undefined symptoms and provide appropriate medical care.

This report summarizes the initial evaluation of the patient, John4, who presented with undefined symptoms. Further assessment and diagnostic investigations are needed to determine the underlying cause and establish an effective treatment approach.

Harold Iseke, D.C.
